-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities: The reference to TUFTONE in the examples fails to teach which of the products used in the examples. Note [6194115] teaching TUFTONE TTR-2, [6136488] teaching TUFTONE NE-1110 and [5795691] TUFTONE NE-382.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shirai et al [6723822] in view of Van Diepen et al. [6350822]. Shirai et al teaches the use of crystalline polyester as a binder for a toner in an electrophotographic developer. Note Col. 1 lines 5-15. The binder is an alkylene alcohol with an aromatic diols reaction product. The alkylene oxide adduct is of a bisphenol A type note Col. 2 lines 45-55. The acid anhydrides taught in Col. 3 lines 40-68. Shirai fails to teach the use of polyfunctional acid anhydrides or the improved rheology of the use of such trimellitic

anhydrides. Van Diepen et al teaches a crystalline polyester made with a polyfunctional acid anhydride Note Col 5 lines 1-20. The advantages are taught in Col.6 lines 55-65. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the anhydrides such as polyfunctional acid anhydrides as the anhydrides in the crystalline polyesters of Shirai et al to have the improved rheology as taught by Van Diepen.

4. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

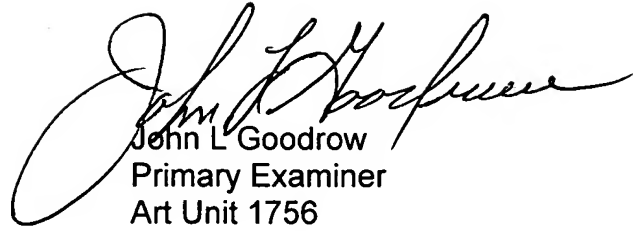

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L. Goodrow whose telephone number is 571-272-1384. The examiner can normally be reached on Monday -Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
